

CES - 409DC

HIGH VOLTAGE BREAKDOWN TESTER 0 - 10KV/30mA DC

CROWN" High Voltage Breakdown Tester is useful for measurement of Breakdown Voltage of Electrical Transformer, Cables & Wires Insulation Material & Components Etc. The Output Voltage & Leakage Current Limit is Settable As Required & Can be Monitor on Digital Meters The Instrument is Also Available With 3 Digit Digital Timer Settable From 1-999 Sec.

SPECIFICATION

INDICATIVE PICTURE

OUTPUT VOLTAGE (DC)

TEST CURRENT

0 - 10KV

30mA

- | | | |
|--------------------------|---|---|
| CURRENT LIMIT | : | Settable from 10% to 100% through continuously Variable control |
| METER | : | Two Digital meters to monitor output voltage & Leakage Current |
| ACCURACY | : | ± 1% of Reading |
| POWER REQUIREMENT | : | 230V AC |
| OPTIONAL | : | Timer - 3 Digit, setable from 0 - 999sec |

HV Tester Can be Made As Per Customers Specification
